

AI Standup Bot: Autonomous Scrum Attendance

Startup Pitch Submission - StandupSync AI Inc.

EXECUTIVE SUMMARY & PROBLEM STATEMENT:

- Problem: Daily 9:30 AM standups disrupt deep developer flow with meaningless status updates and awkward Zoom silences.
- Solution: Hyper-realistic AI avatar that joins Zoom/Teams calls, sighs periodically, looks at a second monitor, and says 'I am blocked by the infrastructure backend' whenever called upon.
- Market Size: 28 Million software engineers globally enduring 15 minutes of standup daily.
- Business Model: B2B SaaS priced at \$49/engineer/month with Slack and Jira blocker integrations.
