

OatFi: Decentralized Oat Milk Consensus

Startup Pitch Submission - OatFi Protocol

EXECUTIVE SUMMARY & PROBLEM STATEMENT:

- Problem: Centralized oat milk production lacks cryptographic provenance and decentralized barista governance.
- Solution: Countertop espresso machines that roast small-batch Nordic oat milk using on-chain temperature consensus. Users stake OAT tokens for latte art NFTs.
- Market Size: \$400B addressable global beverage and specialty coffee market.
- Business Model: 1.5% protocol fee per oat froth transaction + yield farming liquidity pools.
